CONTEXTUAL MASTER

Contextual Master is a special recognition given to TCS associates who have built rich perspectives about the IT landscapes, customers, internal culture, challenges, and aspirations of their respective clients.

I have been recognized as Contextual master by TCS, for my contribution that I made to the project (Ericsson).

MY PROJECTS

Mini Games:

Have created 2 mini games using JavaScript, HTML and CSS which features my frontend and backend developer skills. Every logic is my own idea which emphasized logical skills and gave me tons of experience.

Another notes app:

Project Overview: This is mobile app created for taking quick notes with a single tap. Has Simple, Clean UI which lets to access to a particular note or all notes with one click.

Features: Takes notes on a single tap, Quick search option and Tags feature to classify notes as per user.

Technologies: React Native, NodeJS, Expo.

Expo Store: Complete app is designed only by me and Various builds of the application are uploaded to expo store and have been adding features with each update.
